

PRESTIGE ACCESS CREATED IN SAPPHIRE VERIFIED ON ARRIVAL

A CREDENTIAL WORTHY OF THE SPECIAL GUEST LIST

Aeternum Verify is a complete credential, presentation and verification service for the most important guests at an exclusive occasion. Each guest receives a unique lab-grown sapphire in luxury presentation, prepared for the occasion and recognised on arrival by the dedicated Aeternum Verify reader and host.

It can serve as the principal credential for an intimate occasion, or as a distinguished VVIP layer alongside the organiser's existing ticketing and access arrangements. Every other guest arrives exactly as before.

PRESTIGE

FLAWLESS DEPLOYMENT

Every deployment is delivered as one managed service: sapphire preparation, guest assignment, luxury presentation, Aeternum reader technology, SIA-licensed hosting and a styled VVIP entrance, coordinated from first conversation to final arrival.

An SIA-licensed Aeternum Verify Host operates the readers and leads the arrival experience. At larger events, the Host works alongside the organiser's front-of-house, venue and security teams under an agreed operating and exception protocol.

From preparation and secure dispatch to the final verified arrival, every element is coordinated so that nothing is left to chance.

TWO DEPLOYMENT MODELS

PRINCIPAL CREDENTIAL

For luxury weddings, product launches, private ceremonies and destination occasions.

DISTINGUISHED VVIP LAYER

For selected guests within galas, awards, corporate and hospitality programmes, sport, concerts and major public occasions.

TURNKEY

BEFORE ARRIVAL

Each guest receives a substantial, unique sapphire in luxury presentation, with a personalised invitation card and event pouch. The unboxing becomes part of the occasion: a reveal worth sharing.

PERMANENTLY FORMED IN SAPPHIRE

The identifying pattern is formed within the sapphire's structure, invisible to the eye and recognised by the Aeternum reader in seconds. The credential remains a visually pure gem.

A RITUAL ARRIVAL

The guest presents the sapphire; the Host places it in the reader. A simple, event-approved result appears on screen.

EVENT DELIVERY

Stone assignment, quality assurance and authenticity seal, luxury presentation, reader configuration, the Aeternum Host, the VVIP entrance (carpet runner, barriers and verification stand), staff briefing and back-up provision, all coordinated by Aeternum.

TREASURED & RETAINED

After arrival, the sapphire returns with the guest to its presentation box: an enduring keepsake of the occasion.

ONE GEM,
MANY PRIVILEGES.

WHAT THE SAPPHIRE CAN UNLOCK.

ARRIVE

Instant arrival alerts by SMS to the host, planner or event manager for selected guests. Personal notes on screen for the Host: "Seat at the main table", "Escort to the east terrace", "Plus two: names listed".

ACCESS

Private zones recognised by the same sapphire: bridal party lounge, VVIP lounge, backstage, green room and more.

ENJOY

One-time claims and curated allowances: a gift collection, a reserve tasting, a surprise reveal, a private viewing. Coat check and valet, with the sapphire as the claim.

REMEMBER

A private message from the hosts, invisible to the eye and revealed only by the reader. After the event, the same sapphire can open a private gallery or anniversary invitation.

FULL SERVICE WORKFLOW

From the first conversation to the final verified arrival, every element is managed by Aeternum.

DESIGN → CREATE → DELIVER → ARRIVE & RETAIN

01 ENTRANCE DESIGN
Your VVIP entrance, styled to the event décor: carpet runner, barriers and verification stand.

02 GUEST SET-UP
VVIP tiers, personal greetings, access zones and privileges configured for a guided arrival.

03 SAPPHIRE ENCODING
Every stone laser-encoded within its structure and registered to the event ledger.

04 ASSIGNMENT & ASSURANCE
Each sapphire assigned to its guest, quality-checked, imaged and sealed.

05 IDENTITY CONFIRMATION
Optional third-party ID check before the event, where requested.

06 LUXURY PRESENTATION
Personalised box with sapphire, invitation card and event pouch, delivered to each guest.

07 LIVE UNTIL THE DOOR
Cancellations, substitutions and late guests managed securely, from anywhere in the world.

08 EVENT-DAY DEPLOYMENT
Aeternum readers, SIA-licensed Aeternum host, staff briefing and backup provision.

09 THE VERIFIED ARRIVAL
Sapphire verified, guest photo confirmed by the host. A flawless arrival.

10 TREASURED & RETAINED
The sapphire returns home with the guest as an enduring keepsake.

ONE MANAGED SERVICE · ONE PRICE · NOTHING LEFT TO CHANCE

NO VISIBLE CODE. NO CHIP. NO BATTERY

VVIP IDENTITY AND SECURITY

THREE LAYERS OF VERIFICATION

1. The sapphire: a structurally encoded stone, practically impossible to replicate, verified by the Aeternum reader in seconds.
2. The person: the guest's photograph appears on the reader, and the Aeternum Host confirms the guest in person.
3. Identity in advance (optional): third-party ID confirmation before the event, for occasions that require it.

SIA-LICENSED HOSTS

Aeternum Verify Hosts hold SIA licences. Aeternum can lead with its own Hosts, with additional security staff for larger events, or integrate with the client's security provider.

THE SAPPHIRE AND THE LEDGER

Every sapphire is registered to the event's authorised guest list. Lost, stolen or reassigned stones can be withdrawn, transferred or reissued instantly, from anywhere in the world.

REMOTE ASSURANCE

In the rare event that a sapphire cannot be read, Aeternum's remote team checks it against that stone's recorded master reference and confirms the guest within moments.

DISCRETION

Guest data is used only for the occasion and deleted afterwards, in line with UK GDPR.
